EDUCATION

University of California, Irvine — Irvine, CA
Bachelor of Science in Computer Science; GPA: 3.6/4.0 — *Sept. 2017 - Dec. 2020*

EXPERIENCE

Taco Bell HQ — Irvine, CA (Remote)
Software Engineer — *Oct. 2020 - Present*
- Started as intern deploying AWS lambdas with dynamoDB database and integrated full stack project using React.
- Developed APIs through the use of Serverless framework and Express APIs.

CoderSchool — Fremont, CA
Software Engineer Instructor — *Jun. 2019 - Sept. 2019*
- Held Python, Javascript, and HTML workshops for kids from ages 8 to 16. Integrated programming platforms such as Scratch, Repl, and Pygame.
- Helped increase students' development skills such as teamwork, creativity, and presentation skills.

Prifina — San Fransisco, CA (Remote)
Software Engineer Intern — *Jun. 2019 - Sept. 2019*
- Worked with AWS Serverless services such as API Gateway, Lambda, S3 to implement functions where users could file share through use of NodeJS.
- Documented how and why API functions and Lambda functions are done in AWS Serverless architecture environment, utilizing general practices and logic of serverless .com framework.

Undergraduate Research — Irvine, CA
Researcher — *Sept. 2019 - Present*
- Part of research team at University of California, Irvine that evaluated biomarkers performance when predicting severe sepsis/septic shock.
- Team used Machine Learning Classification and Machine Learning Regression models to predict disease.

ICS Student Council — Irvine, CA
Executive Board of Corporate Outreach — *Jan. 2019 - Present*
- Improved student life at the Donald Bren School of Information and Computer Science academically, professionally, and socially by collaborating with large technology companies to host information workshops and sessions.
- Promoted important events through different social media platforms and presentations.

PROJECTS

SubLeasing for UCI Students — *onthehouse.com*
- Implemented a full stack website using Javascript, MongoDB, and ReactJs for front-end that allows UCI students to post their subleasing properties in a team of four.
- Created login form to verify and allow only accounts with a valid UCI email to create a sublease post
- Integrated admin accounts into database that can delete any post. Users and admins can interact through use of comments inside every post.

Tools for Spotify — *toolsforspotify.com*
- Created web application that allows user to easily delete multiple tracks in a playlist at once.
- Used React and Redux to build web application with back-end NodeJS authorization.
- Connected to Spotify API and stored user playlists/songs to delete songs.

SKILLS

Languages	C++, Python, Java, SQL, Javascript
FrameWorks	React, Redux, Xcode
Tools	Git, AWS
